Overview

Introduction

Tax and Deduction Overrides modify tax and deduction amounts for the current payroll cycle without changing the Employee Masterfile (EMF). Such overrides may be needed for many different reasons such as:

- Advanced collection of healthcare or flexible spending account premiums.
- Override the automatic tax withholding calculation and enter taxes manually to the Employee Tax Masterfile.
- To stop and/or change an employee’s voluntary deduction for one pay period upon request.

Tax and deduction overrides must be processed in conjunction with a regular payment (i.e., the employee must be receiving some amount as Regular pay). If an override must be made to an employee who is not receiving any Regular pay, a Regular pay transaction of one penny must be entered (i.e., on HUA03). This will allow the deduction override to process.

Tax and deduction overrides are entered on the screen, Deduction Overrides (HUD01). Overrides are batch transactions processed overnight, and affect the current pay period only. Permanent deduction and tax changes should be made to the Employee Masterfile.

Taxes should only be overridden in accordance with Federal guidelines as outlined in the Employer’s Tax Guide, Circular E. If taxes are overridden, be sure to retain the supporting documentation.

Note: Never make adjustments to OASDI and HI tax withheld fields, unless processing void through CIPPS, or updating the records to reflect taxes the employee has paid outside the system (otherwise, OASDI and HI taxes are self adjusting).
Procedures—Tax and Deduction Overrides

Form Preparation
Prior to entering overrides online, complete the Tax and Deduction Override Form (Form PR-9). The fields on this form correspond to the fields on the data entry screens, Deduction Override (HUD01) and Pay Transaction Balancing (IBC) (HRSBB). Although use of the form is optional, it serves as a source document for the transaction entered. A copy of the form is available on the DOA website at www.doa.virginia.gov.

Control Balancing

Batch control totals for tax and deduction overrides are entered on the screen, Pay Transaction Balancing (IBC) (HRSBB). Refer to CAPP Topic 50130, Batch Processing and Balancing, for instructions.

Audit Trail

Review the following reports verify that a tax or deduction override has processed by the system:

- Input Transaction Listing (Report 1001)

Internal Control

Agencies must verify that changes to Employee and Tax Masterfiles are properly authorized and have been entered accurately into the system.

Records Retention

Time Period

The Input Transaction Listing (Report 1001) and the Transaction Batch Balance Summary Report (Report 1005) must be retained for 60 days. All other reports should be retained for five years or until audited, whichever is later. The retention of agency source documents/records is determined by agency policy and guidelines.
