Overview

Introduction

The expenditure structure is a mechanism designed to classify the different expenditure categories and collect expenditure information in a systematic manner. The information is used for accounting control, financial management and budgeting purposes.

The Department of Planning and Budget (DPB) is responsible for the definition of all expenditure code information. The Department of Accounts (DOA) working with the Department of Planning and Budget will assign the four digit numbers for all expenditure codes. Requests for the assignment of new or changes in existing expenditure codes should be made directly to DPB.

This information is also available on DPB’s website (http://www.dpb.virginia.gov/) under Documents and Forms – Expenditure Structure.
Levels of Expenditure Definitions

The expenditure classification code consists of four digits which identify the following components:

**Expenditure Character**  **XX**  **XX**  **Subobject**

**Major Object**   **Object**

1. The *first* digit denotes expenditure character, such as:

   1XXX - Operating Expenses
   2XXX - Fixed Asset Expenses
   3XXX - Debt Service Expenses

2. The *second* digit denotes the major object classification of expenditure, such as:

   11XX - Personal Services
   12XX - Contractual Services

3. The *third* digit denotes the object of expenditure, such as:

   111X - Employee Benefits
   112X - Salaries

4. The *fourth* digit denotes subobject of expenditure, such as:

   1111 - Employer Retirement Contributions
   1114 - Group Insurance

For accounting purposes, all source documents must be coded at the subobject of expenditure level using the four digit code, e.g., 1114. For budgeting purposes, the level of expenditure used will differ depending upon the requirements of the source documents.

Expenditure Codes and Definitions, Continued

2212, Mobile Client Computers (microcomputers): Include any mobile computer, usually referred to as a laptop or notebook, which includes laptops with docking stations and other peripheral devices. Also included in this category are handheld computer devices to include wireless.

2214, Mainframe Computers and Components: Includes all components and peripherals up to a network connection. Mainframe is an industry term for a large computer, typically manufactured by a large company such as IBM for the commercial applications of Fortune 1000 businesses and other large-scale computing purposes. Historically, a mainframe is associated with centralized rather than distributed computing.

2215, Network Servers: Includes computers designated by the manufacturer as servers, enterprise servers, server blade frames and components, network storage devices and systems, RAID devices, jukeboxes, etc. In general, a server accepts requests from network clients and performs single or multiple functions including file storage and retrieval, print message controls, application execution, email and communications.

2216, Network Components: Includes assets used in the local area network not reported in 2215 such as routers, switches, hubs, bridges, etc. This also includes cabling system components when not part of a state-owned building renovation or construction project.

2217, Other Computer Equipment: Includes all other equipment that cannot be reported in 2211 through 2216. Examples include printers, kiosks, print copiers, scanners, add-on peripherals for desktops or laptops, network interface cards, devices for reading bar codes, and devices for providing local and wide area connectivity (e.g., modems, codecs). Note: code handheld wireless devices to 2212.

2218, Computer Software Purchases: Include expenditures for the purchase of computer application software, utility programs, and operation system software. The term software is a general term that refers to all programs or instructions that are used to operate computer hardware. Software causes computer hardware to perform activities by telling a computer how to execute functions and tasks. Include payments to software vendors for the renewal of software licenses for off-the-shelf applications and utilities. Code contracts for software development to 1279.

2219, Development Tools Purchases: Includes expenditures for the purchases of software development tools. A development tool is software specifically used in the development of applications by technical staff. Examples of this software are text editors, compilers, build-automation tools, debuggers, ETL tools, and data modeling software.
