Overview

Introduction

The Commonwealth Accounting and Reporting System (CARS) generates in excess of 150 reports on a regular basis. Reports are generated to reflect Statewide or selected agency data on a weekly, monthly, quarterly, annually, and special request basis.

Options may be selected for the level of detail and the reporting period. About 70 CARS reports specifically address the informational needs most agencies encounter in performing their fiscal responsibilities. The remaining reports assist the Department of Accounts (DOA), Department of Planning and Budget (DPB), and others in monitoring the Commonwealth's financial position.

About CARS Reports

CARS Report Numbers

CARS reports are identified by an ACTR or ACTB prefix, along with a four-digit number. The numbering sequence of the report is categorized based on the report content as follows:

Number Series	Type of Report
0100 – 0899	System and Accounting Control
0900	CARS Table Listings
1000	Fund Ledgers
1300	Document and Disbursement
1400	Expenditure
1500	FIPS/Locality Reporting
1600	Revenues/Deposit Certificates
2200	Project
3000	1099 Reporting

The request and generation of the ACTR reports is controlled by the CARS report request subsystem. ACTB reports are batch reports and are not controlled by the CARS report request subsystem.

CARS Report Options

Several CARS reports provide options allowing you to specify the desired sequence and accumulation of data. Most CARS reports contain a fiscal period option. The fiscal period option allows you to specify the fiscal period to be reported. The three fiscal period options are:

- current fiscal month,
- prior fiscal month, and
- prior fiscal year.

Refer to "Table of Reports" for a detailed listing of options available to the agencies.

CARS Report Request Subsystem

This allows DOA users to control generation of CARS reports. This subsystem allows you to request selected options of a report, fiscal period, and agencies or funds to include in the report. In this subsystem, CARS reports can be set for generation on a one time or recurring basis and at a specified frequency.

Reports Distribution Management System

DOA utilizes the Mantissa Reports Distribution Management System (RDMS) to help expedite the distribution of CARS reports to state agencies. RDMS greatly reduces the manual handling in report distribution. RDMS automatically consolidates all reports for an agency into a packet addressed to the agency. Also, included in the packet is a manifest of the accompanying reports. To speed report distribution, RDMS can also route reports to printers on-site at an agency.

Table of Reports

General

This subsection assists agencies in identifying financial reports generated by CARS, which may assist in carrying out fiscal operations.

The report tables are guides to the various CARS reports. The CARS reports have been categorized into broad groupings, such as Expenditure/Disbursement, Revenues/Deposit Listing and, within each grouping, the major control totals or sorts of the data are indicated.

CARS reports can be requested on a weekly, monthly frequency, or as a one-time special request.

Once a potential report is identified utilizing these tables, you will find an example in "Report Samples" using the corresponding exhibit number. "Report Samples" is sorted by numerical and alphabetical indices of the CARS Reports.

Note: CARS report numbers begin with 'ACT' and this is omitted in the report number on the following tables.

Distribution of Reports

Printing of Reports at Agency Site

Reports generated by CARS can be available online in REPORTLINE or electronically transmitted to an agency printer (remote job site) for on-site printing and distribution.

Reportline

For Reportline access, visit the DOA Reportline web site linked from the DOA Home Page: www.doa.virginia.gov

Remote Print

Agencies desiring to receive reports electronically need the following:

- A dedicated access line to the Virginia Department of Information Technology (VITA), obtained through VITA's Telecommunications Branch.
- A printer capable for receiving CARS reports during and after normal business hours with the capacity to receive large print jobs.
- Procedures to ensure printed reports are properly distributed at the agency.

Contact the VITA Help Desk to obtain a "JES (Job Entry Subsystem) Remote Printer Definition." When VITA approves the agency as a remote print site and the above requirements have been met, send a written request to the DOA Systems Analysis and Programming Section.

The request should include:

- JES Remote Printer Identification provided by VITA, and
- Name of agency's system contact person.

Certain job parameters need to be modified and tested. A DOA systems analyst will be assigned to work with your agency contact during the systems modifications and testing to ensure that reports are properly printing at the remote job site. Upon acceptance of the test printing, modifications will be moved to production at DOA. Once completed, the agency is notified by telephone and with written confirmation from DOA that remote site printing will commence and the date of this conversion. And, DOA printing of CARS reports will stop.
