## Overview

---

**Introduction** This topic provides a quick reference for locating and viewing the Data Element, Federal Cost Category and Funding Source Tables in the FAACS Online System.

These three tables can be accessed in FAACS by clicking the “*FAACS Tables*” menu button within the Main Menu and selecting the desired table from the dropdown listing. The system defaults to the Data Element Table but all other tables can be selected by clicking on the table name.

All tables can be downloaded using the XLS download button. Note: The download option creates an Excel spreadsheet of the selected table that can be sorted or filtered based upon the users’ needs. Leading zeros are dropped whenever the download feature is used.

---

**Table Layout** Data Element Codes are organized by Form number, Line number, Element number, Position, Length and Data Description.

Federal Cost Category Table lists the federal cost category number and corresponding description. All nomenclature codes must begin with a valid federal cost category. FAACS contains an edit to ensure that all nomenclature codes contain valid federal cost category as contained in the table.

The Funding Source Table contains the funding source number and corresponding description. The descriptions for each code are used to determine which source code to use based upon which fund the expenditure to purchase the asset was charged. For example, funding source 40 is for the general fund. This would be used for expenditures charged to fund 01000 in Cardinal.

Examples of the Data Element Table and the complete Federal Cost Category and Funding Source Table are shown at the end of this CAPP Topic.
