Exhibit A: Cardinal Security Handbook – Statewide .............................................................. 10
Overview

Introduction

The Commonwealth’s new financial accounting and reporting system, Cardinal, is built on PeopleSoft version 9.1. There are three functional areas included in the base Cardinal system, which include: 1) General Ledger, 2) Accounts Payable, and 3) Accounts Receivable-Funds Receipts. However, there are four software modules included:
General Ledger
Accounts Payable
Expenses (non-payroll employee reimbursements)
Accounts Receivable

The business processes by Functional Area include the following:

General Ledger – business processes:
- System Setup and ChartFields
- Create and Process Budget Journals
- Create and Process Journals
- Period Close

Accounts Payable – business processes:
- Establish and Maintain Vendors
- Enter and Process Vouchers
- Expense Processing
- Process Payments
- Process 1099

Accounts Receivable – business processes:
- Enter Fund Receipts

The Cardinal Security Team is responsible for processing Cardinal access requests.
Policy

Cardinal Access Control

Cardinal Access Control is maintained by the Agency through their Cardinal Security Officers and by the Cardinal Security Team. The Cardinal Security Form must be completed by the Cardinal Security Officer (CSO), required approval signatures obtained, and the form submitted to the Cardinal Security Team in order for access to be granted to Cardinal. Training on Cardinal functionality and processes may also be required prior to access being granted.

Access is granted based on the specific work that an employee needs to perform and the associated Cardinal security role(s). The Cardinal Security Handbook contains a description of each security role. See Agency Requirements for further guidance.

Agency Requirements

Agencies must have sufficient and adequate controls and security over their data and systems.

Agencies should have policies and procedures in place for granting and periodically reviewing access to 1) Cardinal and 2) agency information systems. Access should be based on absolute necessity and use. Individuals who do not use their access frequently in the course of their jobs should be removed. These procedures should include processes for removing access timely for employees that have left the agency. The policies and procedures should include review and approval of access granted as well as the maintenance of documentation of user additions, deletions and periodic user reviews.

Agencies should develop and implement procedures, guidelines, and business practices that facilitate the safekeeping of critical data, which includes financial data. Agencies should ensure compliance with the Commonwealth’s Information Security Standard contained in the current version of the ITRM Standard SEC 501 maintained by the Virginia Information Technologies Agency (VITA).

Agencies are also responsible for ensuring employees understand their roles in internal control over the transactions entered into Cardinal. The agency should have policies and procedures for all business processes.
To gain access to Cardinal, a Cardinal Security Form must be completed, signed by the user, and approved by the individual’s supervisor, the agency Cardinal Security Officer, and DOA General Accounting (if applicable), and submitted to the Cardinal Security Team. Access should be granted based on the specific work that an employee needs to perform and the associated Cardinal security role(s) that allow those duties to be completed.

It is the agency’s responsibility to maintain proper documentation of the approval of access that has been granted to Cardinal users. The agency is responsible for developing and maintaining sufficient internal controls over Cardinal access, which includes developing policies and procedures over the process of adding, changing, and deleting users.

A CSO cannot authorize their own access. The secondary CSO must complete and submit the Cardinal Security Form for the primary CSO.

---

Each agency is responsible for selecting two key individuals to be designated as Cardinal Security Officers (CSOs). These designations should be noted on the agency’s Authorized Signatories Form (DA-04-121). If the CSO changes, an updated Authorized Signatories Form should be submitted to DOA as soon as possible.

The Cardinal Security Officers must list their contact information (phone and e-mail) on the Authorized Signatories Form (DA-04-121). This information will be utilized by the Cardinal Security Team.

For further information on the Authorized Signatories Form, please refer to CAPP – Cardinal Topic No. 20310, Expenditures.
Duties and Responsibilities of the CSO

The duties and responsibilities of the CSO are as follows:

- Sign the Cardinal Security Forms
- Sign the Annual Cardinal Security Review Certification Form on behalf of the agency (Business Unit),
- Ensure and certify that the requested user roles are in accordance with the Cardinal Security Handbook,
- Serve as Cardinal Security liaison between their Business Unit and the Cardinal Security Team to resolve Cardinal user security issues,
- Control an agency's access to Cardinal,
- Ensure adequate internal controls exist within the agency to prevent unauthorized access to Cardinal and the Cardinal data and datasets used to submit data to Cardinal. Note: It is the agency’s responsibility to design and implement these controls. See subsection entitled Agency Requirements,
- Ensure maintenance of documentation of the approval of access that has been granted to Cardinal users, including the periodic review of that access,
- Submit timely security deletion requests for staff who should no longer have access to Cardinal,
- Ensure receipt of current Cardinal policies, procedures, and subsequent updates related to Cardinal security and prompt dissemination to affected agency personnel.

Agency Cardinal Acknowledgement

The Cardinal Security Officers listed on the Authorized Signatories Form have been granted authority to add, change, and delete users in Cardinal that are both preparers and approvers of transactions in Cardinal. Persons granted select approver roles in Cardinal have the authority to approve and release revenue, and expenditure documents and transactions for their agency, department or institution. By approving a transaction in Cardinal, the agency, department or institution, and its employees and agents agree to the certifications contained in the Commonwealth’s Accounting Policy and Procedure Manual for the applicable transaction.
Employee Notification of Responsibilities

With the exception of the initial security access granted through Cardinal implementation of the role mapping task, users must sign the Cardinal Security Form which contains an acknowledgement that transactions entered into Cardinal should be in accordance with applicable CAPP – Cardinal Topics. However, the agency is responsible for ensuring employees understand their roles in internal control over the transactions entered into Cardinal. The agency should have policies and procedures for all business processes. See Agency Requirements for more information.

Statewide Cardinal Security Handbook

The Statewide Cardinal Security Handbook is attached hereto as Exhibit A. The Cardinal security roles are explained in detail in the handbook by role, description, separation (segregation) of duties requirements and other role considerations.

Segregation of Duties Policy Exceptions

Agencies that are very limited on staff may request an exception to the segregation of duties requirements contained in the Cardinal Security Handbook by submitting an exception request that includes the following:

- Providing a written justification to DOA’s Director of General Accounting,
- Having this exception request signed by the Agency Head
- Providing a description of the internal controls implemented by the agency to mitigate the lack of segregation of duties.

DOA will notify the Agency and the Cardinal Security Team when the exception is granted.

Transfer File Security for Interface Agencies

Transfer File Security

Agencies that utilize their own internal financial systems and interface (transfer files) to Cardinal must have sufficient and adequate controls and security over the data and systems. This includes but is not limited to:

- **Access controls:** Agencies should have policies and procedures in place for granting and periodically reviewing access to 1) internal financial systems, 2) Cardinal, and 3) supporting information systems. Access should be based on absolute necessity and use. Individuals who do not use their access frequently in the course of their jobs should be removed. These procedures should include processes for removing access timely for employees that have left the agency. The policies and procedures should include review and approval of access granted as well as the maintenance of documentation of user additions, changes, deletions and periodic user reviews.

- **Information Security:** Agencies should develop and implement procedures, guidelines, and business practices that facilitate the safekeeping of critical data, which includes financial data. Agencies should ensure compliance with the Commonwealth’s Information Security Standard contained in the current version of the ITRM Standard SEC 501 maintained by the Virginia Information Technologies Agency (VITA). **Agencies are responsible for ensuring the secure transfer of accurate and complete data to Cardinal.**

Internal Controls

The control of an agency’s access to Cardinal is vital. The CSO is responsible for ensuring the existence of a comprehensive system of internal control over both online and offline access to Cardinal files. This access control is vital to ensure the integrity of accounting transactions submitted to Cardinal. See the subsections Agency Requirements and Transfer File Security for more information. The internal controls must be documented sufficiently to allow examination by the Auditor of Public Accounts. DOA is not responsible for the existence, design, or function of such internal control systems. See CAPP – Cardinal Topic No. 10305, Internal Control, for further guidance.

Records Retention

Cardinal access records and documentation must be retained for three (3) years or until audited by the Auditor of Public Accounts, whichever is longer. See CAPP – Cardinal Topic No. 21005, Records and Retention, for further guidance.

Cardinal Security Handbook

Each agency is established as a Business Unit in Cardinal and each user in Cardinal is assigned a Row Level Security permission list. This permission list determines the Business Units that the user can access. The purpose of Row Level Security is to prevent users from being able to modify or view data for other agencies. A user can only view, enter, or process transactions for Business Units included in their Row Level Security permission list.

Cardinal users need to be assigned the appropriate roles and security settings in the Cardinal System to have access to do their jobs. This Cardinal Security Handbook is designed to help agencies determine the correct roles for Cardinal users.

Cardinal Security Officers (CSO)

The Cardinal Security Officers listed on the Department of Account (DOA) Authorized Signatories Form (DA-04-121) have been granted authority to authorize the Cardinal Security Team to add, update and delete users in Cardinal that are both preparers and approvers of transactions in Cardinal. By approving a transaction in Cardinal, the agency, department or institution, and its employees and agents, agree to the certifications contained in the Commonwealth Accounting Policy and Procedure Manual for the applicable transaction.

Cardinal Security Form

The Cardinal Security Form must be completed by the applicable agency’s Cardinal Security Officer (CSO). The form should include required signatures prior to submitting to the Cardinal Security Team, in order for access to be granted in Cardinal.

The Cardinal Security Form can be found in the Statewide Toolbox tab on the Cardinal website using the following path:

Statewide Toolbox > Cardinal Security > Cardinal Security Form (SE-SW-001)

Use this form to:
- Assign users to roles within Cardinal
- Update existing Cardinal user information
- Lock out users no longer requiring access to Cardinal

The Cardinal Security Officer will submit the completed form to the Cardinal Security Mailbox at: cardinal.security@doa.virginia.gov

Cardinal User Roles

You will find the following information in the handbook regarding Cardinal roles:

- Role descriptions
- Segregation of duties
- Other role considerations
Segregation of Duties Policy Exceptions:

Several combinations of Cardinal security roles have been noted as potential segregation of duty (SOD) conflicts in this handbook. As a general rule, SOD role combinations will not be granted to Cardinal users. Exceptions can be requested for agencies where limited staffing is available or special circumstances exist. Before completing or submitting a security form where an SOD role combination conflict is being requested for a user, the agency should first complete the following steps in order to obtain approval for an agency SOD conflict exception.

- Submit a written request to DOA's Director of General Accounting (email: gacct@doa.virginia.gov) that includes:
  - Exception requested
  - Justification for the exception
  - Description of the internal control implemented by the agency to mitigate the lack of segregation of duties
  - Approval (signature) from your Agency Head
- DOA General Accounting will notify the agency in writing if the exception is granted.

Once the SOD Exception has been approved by DOA General Accounting, the agency should take the following additional steps when submitting a Cardinal Security Form (SE-SW-001) for any user requesting SOD conflicting role combinations:

- Complete the Cardinal Security form (flagging the SOD Exception), attach a copy of the DOA General Accounting notification granting approval of the applicable agency exception
- Scan and email the form and exception approval notice to DOA's Director of General Accounting (email: gacct@doa.virginia.gov)
- If approved, DOA General Accounting will sign the form, scan and email the approved form to Cardinal Security at cardinal.security@doa.virginia.gov and to the Cardinal Security Officer for that agency
Accounts Payable User Roles

Accounts Payable (AP) is the main source of all non-payroll payment information for a financial entity. AP includes the following processes:

- Establish and Maintain Vendors
- Enter and Process Vouchers
- Expense Processing
- Process Payments
- Process 1099

About this Section

This section outlines the available roles for AP in Cardinal. Use the AP User Roles and Descriptions Table below to determine the appropriate AP roles needed by agency users in Cardinal.

The AP User Roles & Descriptions Table provides the following information:

- Role Descriptions
- Segregation of Duties
- Other Role Considerations

</thead>
</table>
| **Secure Payment Reporter** V_AP_COVA_SECURE_PMNT_REPORTER | This role has access to:  
• Run payment reports containing sensitive data  
• Run Payment History by Vendor, Payment History by Bank, Payment History by Payment, and Trial Register reports | N/A                   | N/A                       |
| **Petty Cash Processor** V_AP_COVA_PETTY_CASH_PROCESSOR | This role has access to:  
• Create petty cash checks via express pay page | Should not be given to a user with the Voucher Approver or Final Voucher Approver roles. | N/A                       |
| **Payment Cash Configurator** V_AP_COVA_PYMNT_CASH_CONFIG | This role has access to:  
• Set payment priorities for specific vouchers, expense reports, and/or cash advances via cash checking transaction priority page | N/A                   | N/A                       |
| **WF System Administrator** V_COVA_WF_WL_REASSIGN | This role has access to:  
• Move worklist items from one User to another.  
• Set the Alternate User ID to which future transactions will flow. | Should not be given to a user with approval access to Vouchers and Journals. | This role should be assigned to one User and no more than 2 backups per agency. |
| **EDI VIEWER** V_AP_COVA_EDI_SRC | This role has access to:  
• Run the query for the EDI vendor list.  
Note: This role is available to Tier II and Tier III agencies only. | N/A                   | This role will have access to sensitive data, as it will be able to view Vendor TIN. |
Accounts Payable Workflow

About this Section

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level for action (approve or deny).

Expenses Workflow

Expense transactions are routed for approval based on Department IDs

The following Expense role(s) are tied to workflow:

- Expense Approver

As a general rule, only employees assigned to the Expense Approver role because it deals with the approval of expenses. Non-employees cannot be assigned to this role. When an expense transaction is entered for an employee, the person who is identified in Cardinal as their supervisor in their expense profile will be the first level of Cardinal approval for online agencies. This is not necessarily their operational supervisor, as not all supervisors have users IDs in Cardinal. The supervisor approver level does not apply for interfacing agencies.

Please use the information provided below to select the appropriate Expense Approver workflow profile for your users in Cardinal and list the department ID ranges for which the user will approve. A user can only be assigned to one of the below expense approver profiles and only one user per profile/department range combination.

<table>
<thead>
<tr>
<th>Expense Approver Profile</th>
<th>Profile Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fiscal Officer</td>
<td>Approval of all expense reports, travel authorizations, and cash advances. This approval level is optional for online agencies.</td>
</tr>
<tr>
<td>Agency Head</td>
<td>Approval of expense reports and travel authorizations containing expense amounts over the allowable amount and/or over $500. Interfacing agencies will not have the Agency Head approval level in Cardinal.</td>
</tr>
<tr>
<td>DOA Pre Audit</td>
<td>Approval of expense reports for Capital Outlay projects. This role may only be selected by employees of the following agency(s): Department of Accounts – General Accounting</td>
</tr>
</tbody>
</table>
Voucher Workflow

Users assigned the following role will be assigned the agency specific route control profile(s) in order to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

- Voucher Approver or Final Voucher Approver

If the user is assigned to the Voucher Approver or Final Voucher Approver role, agencies will need to identify the Business Unit number(s) for which that user can perform approvals. Please note, the Final Voucher Approver role is only applicable to agencies that have previously selected two levels of voucher approval.
Accounts Receivable User Roles

Accounts Receivable (AR) is the functional area that handles a series of accounting transactions dealing with funds receipts. AR includes the following process:

- Enter Funds Receipts

About this Section

This section outlines the available roles for AR in Cardinal. Use the AR User Roles & Descriptions Table below to determine the appropriate AR roles needed by agency users in Cardinal.

The AR User Roles & Descriptions Table provides the following information:

- Role Descriptions
- Segregation of Duties
- Other Role Considerations

General Ledger User Roles

General Ledger (GL) is the functional area that handles the set of financial accounts used to: accumulate the results of transaction processing, create budgets, generate financial statements and provide source financial data for reporting purposes. GL includes the following processes:

- System Setup and ChartFields
- Create and Process Budget Journals
- Create and Process Journals
- Period Close

About this Section

This section outlines the available roles for GL in Cardinal. Use the GL User Roles & Descriptions Table below to determine the appropriate GL roles needed by agency users in Cardinal.

The GL User Roles & Descriptions Table provides the following information:

- Role Descriptions
- Segregation of Duties
- Other Role Considerations

| Journal Processor V_GL_COVA_JOURNAL_PROCESSOR | This role has access to:  
  • Enter journals online  
  • Enter spreadsheet journals  
  • Edit journals online  
  • Budget check journals online  
  • Copy a journal  
  • Execute Spreadsheet Upload process (batch process)  
  • Review budget check exceptions | Should not be given to a user with the Journal Approver role. | Agencies cannot enter an “agency to agency” (ATA) journal that crosses business units outside of their control group. Agencies will need to submit requests to DOA General Accounting when an ATA journal is needed (see CAPP Cardinal Topic 20405 for details). |
<p>| Journal Processor Interfacing V_GL_COVA_JRNL_PROCESSOR_INT | This role is the same as the Journal Processor role above, but it is only available to Interfacing Agencies. | Should not be given to a user with the Journal Approver role. | N/A |</p>

| **Journal Approver** V_GL_JOURNAL_APPROVER | This role has access to:          • Approve journals  
• Post journals through batch process or online  
• Review journal lines  
• Execute Spreadsheet Upload process (batch process)  
• Execute Journal Edit through batch process  
• Execute Journal Budget Check through batch process | This role should not be given to a user with the Journal Processor, Journal Processor – Interfacing or Workflow System Administrator roles. | N/A                       |
| **Agency ChartField Administrator** V_GL_COVA_AGENCY_CF_ADMIN | This role has access to:          • Maintain Agency controlled ChartFields (Department, Project, Cost Center, Task, Asset, Agency Use 1, Agency Use 2)  
• Maintain SpeedTypes/SpeedCharts | N/A | N/A |
| **Budget Processor** V_GL_COVA_BUDGET_PROCESSOR | The Budget Processor is responsible for budget journals at the agency-level. This role has access to:  
• Enter budget journals, budget transfers and budget adjustments  
• Upload journals using the Spreadsheet Budget Journal upload  
• Review and correct budget journal errors | Should not be given to a user with the Budget Approver role. | N/A |
| **Budget Approver** V_GL_COVA_BUDGET_APPROVER | The Budget Approver is responsible for agency-level budgets. This role has access to:  
• Post budget journals through online or batch process  
• Delete budget journals through online or batch process  
• Post budget transfers and adjustments  
• Override agency level budget exceptions  
Upload spreadsheet budget journals | Should not be given to a user with the Budget Processor role. | N/A |

| **General Ledger nVision Executor**  
*V_GL_COVA_NVISION_EXECUTER* | This role has access to:  
- Maintain the scope of nVision reports  
- Create nVision report requests | This role may only be selected by employees of the following agency/division(s):  
- Department of Accounts  
- BOA | This role requires the user to also have the CAFR Processor role. |
| **CAFR Processor**  
*V_GL_COVA_CAFR_PROCESSOR* | This role has access to:  
- Enter and report on CAFR ledgers (Cash, Modified Accrual, Full Accrual)  
| This role may only be selected by employees of the following agency/division(s):  
- Department of Accounts  
- BOA | This role has to be assigned in conjunction with the Journal Processor role in order to be able to enter journal entries to the CAFR ledgers.  
<or>  
This role has to be assigned in conjunction with the Journal Approver role to be able to post CAFR entries, although there is no approval process for CAFR entries. |
General Ledger Workflow

About this Section

Workflow is an automated process that takes a Cardinal transaction and routes it to the next approver level to approve or deny. The GL Journal Approver is tied to workflow.

Users assigned to the following role will be assigned the agency specific route control profile(s), to properly route transactions for approval. Route control profiles are assigned to users to identify the areas on which they work.

• Journal Approver

If the user is assigned to the Journal Approver role, agencies will need to enter the Business Unit(s) for which that user can perform approvals.
Additional User Roles

The additional roles that follow relate to reporting, queries, PeopleSoft user system setup and Special Approval roles.

About this Section

This section outlines additional roles in Cardinal. Please use the Additional User Roles & Descriptions Table below to understand the roles all Cardinal users will receive.

The Additional User Roles & Descriptions Table provides the following information:

Appendix

Statewide Central Roles

Statewide Central Roles are only available to select agencies and/or operations, for example: Department of Accounts (e.g., General Accounting, Commonwealth Vendor Group), Department of Treasury, etc. Any request to assign a Statewide Central Role requires approval from a designated Cardinal DOA Approver or specific designee noted in the table that follows.

About this Section

This section outlines central roles in Cardinal. Please use the Statewide Central Roles & Descriptions Table below to understand the roles in Cardinal that will be controlled by central departments.

The Additional User Roles & Descriptions Table provides the following information:

- Role Descriptions
- Restrictions
- Other Role Considerations
