Overview

Introduction

The purpose of this topic is to provide guidance on downloading data and FAACS records from the Fixed Asset Accounting and Control System (FAACS). An Excel download feature has been added to FAACS that makes downloading information easy to perform.

Whenever an **XLS** button is shown on any FAACS screen (Master File or Other Screens such as the FAACS Tables), the user can click this **XLS** button to download the information into Excel. Please note that when downloading FAACS information into Excel, leading zeros **will be dropped** from the download.

One such example of this occurs in the FAACS Master File where the Asset ID contains leading zeros. For instance “000000007” and the Excel download would show this Asset id as “7” since the leading zeros were dropped.

If the leading zeros are required, users will need to insert a column to the left of the downloaded column containing the “dropped” zeros. This new column should contain the following text “A00000000” and then as second column should be inserted to the left of this new column.

This new column containing the text plus the original column where the leading zeros were dropped should be “concatenated” using the Excel “concatenate” function. You would then insert a third column and use the “right” function in Excel to restore the leading zeros to this third column.

1. Click the “XLS” menu button
2. A pop-up message will appear that asks if you want open or save the Excel download as follows:

Do you want to open or save **FAACS_Master_151.xls** (569 KB) from wsq02230.cov.virginia.gov?

×

3. Click the “Open” button. This opens an Excel workbook of the FAACS Masterfile containing three worksheets. For purposes of this CAPP topic, we will only discuss the “DATA1” worksheet. See below. Note that in the “Identification” column leading zeros have been dropped from the Identification number.
4. You have just performed and Excel download in FAACS.

Procedures, continued

7. Insert a third column and use the “right” function in Excel to restore the values in “concatenated” column to the number of characters in the online FAACS Master File. Copy this formula to the last row containing data. You may recall from earlier CAPP topics that the FAACS Asset Identification Number is 9 alpha-numeric characters. Note that after performing steps 5, 6 and 7 that the “Right” column now contains a 9 character Asset Identification Number with leading zeros.

Other Excel Downloads

In addition to the FAACS Masterfile, users may download other information from FAACS including:

- Data Element Tables
- Error Message Table
- Federal Cost Category Table
- Funding Source Table and the
- Nomenclature Table

The same process as shown in steps 1 through 7 can be repeated to restore the leading zeros in these other tables as well as any other Excel downloads that may be performed in FAACS.

Volume No. 3—Automated Systems Applications	TOPIC NO. 70355—Cardinal
Function No. 70300—FAACS Online	TOPIC FAACS DOWNLOAD
	DATE January 2020
